July 16, 2009

Dear SUSD Families and Community Members:

Scottsdale Unified School District (SUSD) is excited to let you know that construction is starting for our classroom technology updates!

The updates to a typical classroom include a ceiling-mounted projector, a document camera, a wireless audio system and an interactive white board.

Construction begins at Supai Middle School on July 20th and then continues at each school until it is complete. We plan to have construction and implementation complete at 10 schools by the time school starts on August 10th. The amount of time each site will take to complete varies depending on construction requirements and what technology they currently have in place.

Another exciting thing about this process is that you can now follow us on Twitter, where we will be providing ongoing updates. To sign up, visit <http://twitter.com/ScottsdaleUSD>.

There are also two other ways to stay abreast of our progress on technology implementation. We will have updates in our regular newsletter, Community Connection, as well as a dedicated page on our District Web site that will contain lots of additional information. To sign up for the newsletter, visit <http://www.susd.org/district/communications/emss.cfm>.

We anticipate that the implementation will be done so that all classrooms meet the standards established by the District's Technology Plan by the end of the fall semester.

Sincerely,

Tom Clark
Executive Director for Technology and Information Systems
