

Academic Intervention Information

First and most important, please reach out to the teachers. They are the first stop when it comes to helping students improve. Most of the teachers on campus do have office hours or tutoring times that students can take advantage of. Teachers are using a variety of techniques in class to help your student but please feel free to share any ideas that you feel might help your student.

Below are several resources that may be beneficial for your student to participate in.

- **Teacher Office Hours:** Now during lunch many of the teachers are willing to help students. Teachers also may have help hours before and after school. Please consult teachers for exact days and times.
- **Math Lab:** Every Monday and Wednesday 2:30-3:30 in room 4113.
- **Physics Club Tutoring:** Physics Club members are available for Physics tutoring at lunch in room 7112. The Physics teachers are available most days before or after school for tutoring with the exception of Wednesday before school and Friday after school- see them for details.
- **World Language Lab:** Every Tuesday and Thursday from 2:30-3:30 in room 4113.
- **Personal Tutors:** The guidance has a book of peer tutors willing to tutor 1-on-1 for free or low cost. Please send your student to guidance office to look up names. The guidance office also has a list of paid professional tutors.

We also ask you please start some academic interventions at home, if you are not already doing them.

- Please check grades online weekly if not daily while your student is struggling.
- In addition to grades online most teachers post missing assignments or future assignments. This can be used for those times when your student says they do not have any homework.
- Set up a homework area and time that your student should be held accountable to use daily.
- Be supportive of tutoring availability. Help your students get to school early or stay late when needed to catch up on work.

Hopefully, with all of these opportunities and your support we can assist your student to succeed in all of their classes. Please let me know if there is any additional information that would be beneficial for us to help your student.
