At the June 20 SUSD Governing Board meeting, district leadership expressed concern that an annual Truth In Taxation statement had not been published last year, as required by law.

Upon further investigation, our financial team found an invoice in our archives that indicates we did publish the statement with one newspaper. However, we did not issue the required press release.

This year, all steps were followed, and systems are in place to make sure the truth in taxation statement is published properly, moving forward. The Scottsdale Unified School District is committed to good financial stewardship and transparency.
