Governing Board Discussion re: School Capacity 12/11/18

Presented capacity numbers of all schools. To determine when it is time to build new buildings. Not rebuilds. Projections were made. Around 2100 for Arcadia. Conversation shifted to multiple factors. Principals will need to make a new number that is of reality based on current factors. Mr. Stevens shared that our number will remain around 1750. Not looking to go up based on our availability. Based on averages. During the Arcadia rebuild, capacity was around 1400+. From then until now what determined the changes? Public class sizes went up statewide. Economic changes we try to remain. Positive aspect is growth in electives. Managing the numbers outside the classroom is very important.
